

Laser Cut Design Stencil Project Sheet

1. Cut out your stencil carefully.

2. Roll out your clay using the 1.5mm thickness (white) strips. Place the stencil over the clay and then roll gently again.

3. Using your craft knife, cut around your design, leaving a border. Dry then gently take off the stencil. You can reuse the stencil again. File and sand as necessary.

4. Fire and polish as usual. You can then oxidise, resin or enamel your pendant.
