Twisted Serpentine (SV925 Chain) 40cm	1pc
Art Clay Silver 650/1200 Paste Type	a little
Fine Silver Round Wire 0.8mmφ	8mm
Round Jump Ring(Small)	1pc
Blue Mix (Silicone mold/100g+100g)	1pc

Complete piece

<Step by Step>

1) Cut the 0.8mm Fine Silver Round Wire into 8mm long, and bend it L-shape with some flat pliers etc.

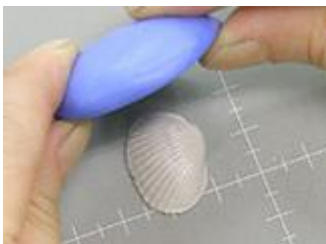

2) Mix the same amount of A (White) and B (Blue) well. Mix them quickly within 30-40seconds until colour becomes even.

3) Cover a shell with Blue Mix firmly without any gaps, and take a cast of the shell. When it becomes completely solid after about 30 minutes, take off the shell from the mould.

4) Paste some oil into the mould, and fill with 5g of Clay Type.

5) Take the clay from the mould while the clay is still soft.

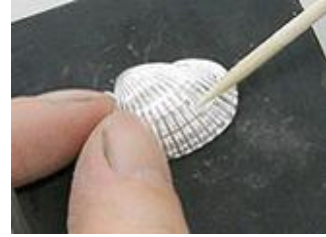

6) Apply a lot of Paste Type on the screw parts of the Small Flat Screw Eye and cut Fine Silver Round Wire, wipe off any extra Paste Type with a moistened brush, and dry.

7) Trim any burrs with a medium fine file, smooth the entire piece with a red sponge sanding pad (#320-600) and fire.

8) Polish the entire piece with a stainless steel brush, then polish the surface with a burnisher to make a glittered shell pattern.

9) Attach the cut Fine Silver Round Wire with some epoxy glue to fix a pearl, attach a chain and finish.
